NEW OUTDOOR PRODUCT LINE FROM NEMI!

NEMI is introducing an all new line of gear for outdoor enthusiasts in 2016! We have always provided quality fire rings, fishing accessories, and more, but we're excited to introduce two new products!

Our spacious fish houses are constructed of maintenance-free aluminum

and built to your specifications. These lightweight houses are fitted with a super bright LED lighting system and are delivered to you finished or unfinished. Whatever you desire!

NEMI is also proud to introduce our WAGONTRAXX Decoy Donkey*! This workhorse is an electric cart with tracks that can be used for nearly any outdoor sport or project! Made of lightweight aluminum, the WAGONTRAXX features 1000 lbs of hauling capacity, 24v variable speed electronics, and

programmable controls! It's also fitted with our LED lighting system, making it perfect in dark, outdoor conditions.

*Patent Pending

All of our products offer the highest possible build quality and are made right here in the USA. Be sure to stop by and check out a demo model of these and our other outdoor products!

County Rd. 25

NEMI ON THE ROAD

NEMI recently attended the WMS show in Toronto! We had a great time seeing some familiar faces and making new friends. We met with a number of woodworking pros and demonstrated how vacuum applications can be used to simplify operations. Thanks to CNC Automation, who was gracious enough to allow us to share their floor space. We both learned a lot about each other throughout the show!

SHOP SPOTLIGHT

Machinist, Brennan Papesh, working on a custom pallet changing system. This system will allow the end user to quickly and efficiently load parts on and off their machine. The system is placed at the end of the machining table and will slide parts on to one side

of the machine at a time. While one side of the machine is at work, the second side can be unloaded and reloaded for continuous work flow and maximum efficiency.

NEMI just announced their industrial pod & rail vacuum line with integrated material lifting bars!

More details coming soon!
